European countries should prepare for a far-reaching debate on the "profound lifestyle changes" required to limit climate change, according to a leaked European commission document.

The commission will tell foreign ministers meeting in Brussels on Monday that a

NEW DELHI, FEBRUARY 15: India will add 3,790 MW of solar power capacity by March 31, 2016 to take the total installed capacity in India to 9,038 MW, the Ministry of New & Renewable Energy said.

Giving a status report on the implementation of various schemes to achieve the target of 100,000 MW solar capacity by 2022, the Ministry stated that till January 31 a total of 5,248.21 MW has been installed. The maximum capacity of 1,264 MW is installed in Rajasthan while Gujarat comes in second place with 1,024 MW.
